Khronos Overview
Connecting Software to Silicon

Neil Trevett
Khronos President
VP Developer Ecosystems, NVIDIA
ntrevett@nvidia.com | @neilt3d
January 2021
What is A True Open Standard?

INTEROPERABILITY standards define precise COMMUNICATION
Through a specification that enables multiple conformant implementations
Created under multi-company governance at a Standards Developing Organization (SDO)

E.g., Software <-> Hardware Communication through an Application Programming Interface (API)

Standards Grow Markets
By reducing consumer confusion and increasing capabilities and usability

Standards Reduce Costs
By sharing development between many companies and driving volume

Standards Speed Time to Market
With well-proven functionality, testing and interoperability

Standards Enable Innovation
Companies compete on implementation quality, performance, power etc. etc.
Khronos Connects Software to Silicon

Founded in 2000
>150 Members ~ 40% US, 30% Europe, 30% Asia

Open, royalty-free interoperability standards to harness the power of GPU, multiprocessor and XR hardware

3D graphics, augmented and virtual reality, parallel programming, inferencing and vision acceleration

Non-profit, member-driven standards organization, open to any company

Well-defined multi-company governance and IP Framework
Khronos Active Initiatives

3D Graphics
Desktop, Mobile and Web

3D Assets
Authoring and Delivery

Portable XR
Augmented and Virtual Reality

Parallel Computation
Vision, Inferencing, Machine Learning

Safety Critical APIs
Multiple Khronos standards are often relevant to developers with similar requirements

Khronos currently identifies six such market segments

Working Groups within a segment coordinate and cooperate to develop coherent solutions and outreach programs.
Khronos Principles of Organization

Any company is welcome to join. One company one vote

Any company can propose new standards initiatives: members and non-members

Only invest where there is strong industry momentum to ensure industry relevance - let Darwinism rule!

IP Framework protects members IP while enabling ROYALTY-FREE specifications: members agree not assert patents against conformant implementations they help create

Conformance Tests and Adopters Programs for specification integrity and cross-vendor portability

Non-profit organization, Membership and Adopters fees cover operating, marketing and engineering expenses
Khronos Cooperative Framework

Khronos Board sets strategy, budget and oversight

$\$\$

One vote per industry member

Advisory Panels of invited industry Experts. Provide requirements and specification feedback

API Working Groups (Industry, Academic and Associate members)

Adopters Programs

Conformance Tests
Royalty-Free Specifications
Implementations, Tools Documentation, Samples
Educator Guidelines Courseware Materials

Adopters

Build conformant implementation and products

Developers

Develop applications using the APIs

Educators / Certifiers

Create Courses Training and Certification

Industry and Community Feedback and participation

Open and royalty-free, often open sourced

**Benefits of Khronos Membership**

- Gather industry requirements for future open standards
- Draft Specifications Confidential to Khronos members
- Publicly Release Specifications and Conformance Tests
- Gain early insights into industry trends and directions
- Influence the design and direction of key open standards that will drive your business
- Accelerate your time-to-market with early access to specification drafts
- Network with domain experts from diverse companies in your industry
- State-of-the-art IP Framework protects your Intellectual Property
- Enhance your company reputation as an industry leader through Khronos participation
